

Programmable Ammeters

Ajinkya Electronic Systems manufacture Programmable Ammeters for AC and DC applications. These ammeters can be used with any external DC shunt or AC CT.

High low alarm outputs are optional. Other features like peak hold, retransmission output, MODBUS serial PC Interface are also available.

Ampere hour meters / Watt meters / Current Voltage loggers etc. are other models available.

FEATURES

- Microcontroller base digital circuitry
- For DC current indicator, input 0-100 mV
- For AC current indicator, input from any 5A CT.
- Four digit LED Display
- High / Low alarm value programmable
- One / Two relay outputs
- Supply 230 V / 110 V AC or 10-30 V / 40-70 V DC
- Size 96x96 mm DIN standard

OPTIONS

- RS232 / RS485 output for computer interface.
- Printer output.
- Real time clock with Data Logging
- 4-20mA retransmission output
- Peak hold facility
